EDUCATION

Bachelor's Degree in Informatics Engineering

Instituto Superior de Engenharia do Porto

(Current average: 15/20)

February 2024 – June 2027 | Porto, Portugal

CERTIFICATIONS & TRAINING

Cisco Certified Network Associate (CCNA)

Issued: August 2026 | Expires: August 2029

Fortinet NSE 4: FortiOS Administrator

In progress

AWS - Cloud Practitioner

Course only - Not Certified.

AWS - AI Practitioner

Course only - Not Certified.

PROJECTS

Homelab — Linux & Network Infrastructure

2025 – Present

Linux, Docker Compose, WireGuard, OpenVPN, AdGuard Home, Nginx Proxy Manager, CrowdSec, Prometheus/Grafana, Bash

- Administer a Linux server running containerized services used daily; manage Docker Compose deployments, persistent storage, WireGuard and OpenVPN, DNS with AdGuard Home, reverse proxying with Nginx Proxy Manager, and Prometheus/Grafana monitoring.
- Maintain CrowdSec security controls and automate cron-scheduled backups, retention, restore testing and cleanup with Bash scripts.

Automated Multi-Site Network Infrastructure

2026

Cisco IOS, OSPF, GRE/IPsec, Ansible, LibreNMS.

- Implemented a three-site network lab on physical Cisco hardware, with IPv4/IPv6 addressing, VLANs, inter-VLAN routing, OSPF over GRE/IPsec VPNs and NAT; configured HSRP and EtherChannel for redundancy and Rapid STP for loop prevention and faster convergence.
- Configured DHCPv4/v6, WLC-managed wireless with FlexConnect and VoIP; applied ACLs, port security, DHCP snooping, Dynamic ARP Inspection and BPDU Guard.
- Automated device configuration backups with Ansible, centralized network monitoring and logging with LibreNMS, SNMP and Syslog; configured NTP synchronization across network devices.

ISEP Career Summit Wireless Deployment

2026

Cisco WLC, CAPWAP, Cisco APs

- Deployed a temporary wireless network for a 3-day faculty career event designed to support up to 100 users, using a Catalyst 2960 PoE switch, 3 Cisco Aironet lightweight APs, Cisco Virtual WLC, and external gateway/DHCP.
- Troubleshoot AP-to-WLC join issues using AP/WLC logs and Cisco show commands across DHCP, CAPWAP, and DTLS; identified expired AP MIC certificates and enabled the WLC certificate-expiry workaround to restore AP registration.
- Configured dedicated management IP addressing and hardened Layer 2 access with unused-port shutdown, a blackhole VLAN, PortFast and BPDU Guard.

SKILLS

Networking: Cisco IOS, Routing & Switching, TCP/IP, IPv4/IPv6, VLANs, OSPF, NAT, ACLs, DHCP, DNS, VPN.

Linux & Infrastructure: Linux System Administration, Docker, Docker Compose, Nginx/Reverse Proxy, Git.

Monitoring & Automation: Prometheus, Grafana, LibreNMS, SNMP, Syslog, Bash/Shell Scripting, Ansible.

Programming: Java, Python, C, RISC-V Assembly, SQL.

LANGUAGES

- Portuguese - Native.
- Spanish - B1, Limited working proficiency.
- English - B2, Professional working proficiency.
